

Dedication

- This page is **optional**.
- It must continue the number order from the Abstract.
- If you choose to have a Dedication section, it must be on a separate page from your Acknowledgements, and it would be placed after your Acknowledgements section and before your Table of Contents.
- The page number must be at the bottom center of the page (and be consistent with the font style and size of the rest of the document text)
- Must be double-spaced and the margins must be 1" on all sides (top, bottom, right, left)
- The font size, style, and type must be consistent with the rest of the document.
- A title is not required for your Dedication page (i.e., you do not need to have the header: Dedication). However, if you do have a title (Dedication), then it must be consistent with the font style, size, and type of the rest of the primary/major section headers and chapter titles.
- Your Dedication does not have to be listed in your Table of Contents.
