

UNLV RM&S Guidelines for Bodily Waste

This guideline is to help staff members determine who to contact if they encounter a situation where blood, vomit, urine, or feces are involved. The waste generated can be managed as regular trash unless the area is deemed a crime or trauma scene (for example: homicide, suicide, major accident, workplace violence). If the waste is determined to be a Regulated Medical Waste by RM&S, it cannot go in the regular trash.
